Reading 1: HTML and CSS

Before the class during the week of March 23, you should review and understand the following materials on HTML and CSS. These topics will <u>not</u> be covered in the course lectures.

If you have taken the "Introduzione alle Applicazioni Web" course, a similar course during your bachelor's degree, or if you are already familiar with HTML and CSS development, you may skip this reading.

HTML

1. *Structuring content with HTML*, all the tutorials under "Tutorials and challenges" up to "HTML table accessibility" included: https://developer.mozilla.org/en-US/docs/Learn_web_development/Core/Structuring_content.

CSS

1. *CSS Styling Basics*, all the tutorials under "Tutorials and challenges" up to "Styling tables" included: https://developer.mozilla.org/en-US/docs/Learn_web_development/Core/Styling_basics
2. *CSS Text Styling*, all the tutorials up to (and including) "Styling links": https://developer.mozilla.org/en-US/docs/Learn_web_development/Core/Text_styling.
3. *CSS Layout*, all the tutorials under "Tutorials and challenges": https://developer.mozilla.org/en-US/docs/Learn_web_development/Core/CSS_layout.
